To run Diamond Discovery software we recommend the following configuration:

- A Personal Computer with a processor running at 500MHz or 1.2GHz for Vista
- 512MB RAM or 1GB RAM for Vista
- Up to 100MB disk space for installation. Additional space will be required for your data
- SVGA monitor with minimum 800x600 resolution
- CD/DVD
- Windows 2000/2003/XP/Vista

The system may work on lesser hardware and software configurations but performance cannot be guaranteed. Some features are provided as modules. Detailed functionality of common features increases through the product range. Please contact us for more details.
